

PROPOSITION 65

Product Compliance

PIX Transmissions Ltd. is committed to sustainability and complying with all product safety requirements applicable to our products, including the Proposition 65 (Prop 65) standard under Test Report No.RPT/T(A)/21/001381 dated 2021.02.18 issued by TUV SUD South Asia India Pvt. Ltd.

Prop 65 Regulation applies to any company which operates, manufactures, or sells its products initially in the state of California, but now applicable to the Global market. The purpose of Prop 65 is to ensure that the community is informed of any potential exposure to chemicals known to cause cancer, birth defects, or other reproductive harm. The law also requires companies to give warnings/test certificate about their products if they contain any such hazardous chemicals. As such, Pro 65 compliance is more stringent than Restriction of Chemicals (REACH) Regulation or the Restriction of Hazardous Substances (RoHS) Directive.

With a view to continually enhancing its green credentials, PIX is frequently reviewing the list of chemicals in the composition of our various products and updating compliance norms wherever applicable to meet with the current regulations.
